WINDSHIELD REPAIR

Until now a small crack, chip or break in your laminated windshield meant you had to go for an expensive replacement. Not any more. At Windshield Experts, we have the technology to repair

minor damages. For a repair to be effective, it is important to have it carried out as soon as possible. Otherwise, the damage can get worse and you may need to replace the windshield. Plus, you should never forget to cover the damaged area immediately with a windshield saver patch. This will prevent dirt and moisture from getting into the crack. So always keep some saver patches in the glove compartment of your car for use in emergency.

Before we repair, we assess the damage. If it is well within the prescribed standards for safe repair, then our experts make it virtually unnoticeable using world-class technology and materials. But if it's not, only in that case we go for replacement. *For FREE saver patches, contact 1600-11-3636 or e-mail us at: help@windshieldexperts.com

WINDSHIELD REPLACEMENT

Windshields invariably bear the brunt of problems created by modern road conditions. Since they provide upto 40% of a car's structural strength, in case of any damage, it is important that prompt attention be given to proper re-installation of windshields.

At Windshield Experts, we replace windshields using safety glass and other components that meet the international safety standards specified by the car manufacturers. As a result, your windshield replacement will be as good as new.

SIDE AND REAR GLASS

We also specialise in replacing side and rear glass of vehicles. The glass we use is of the same quality and standards as prescribed by the car manufacturers.

Windshield Experts. Bringing a new concept in automotive glass repair and replacement, and setting new standards in customer service.

WE PRODUCTS

Besides car glass repair and replacement, Windshield Experts also offers a host of other services like security car glass etching, sun films, glass cleaners, rain repellents etc. (Please contact us for details).
